目 录

1 系统要求..... - 1 -

 1.1 硬件要求..... - 1 -

 1.2 操作系统要求..... - 1 -

 1.3 环境准备..... - 1 -

2 安装及配置数据库服务器..... - 2 -

 2.1 安装准备..... - 2 -

 2.2 安装方法..... - 2 -

 2.2.1 典型安装..... - 2 -

 2.2.2 定制安装..... - 8 -

 2.2.3 静默安装..... - 18 -

3 使用 GBase 8s 数据库 - 20 -

4 卸载 GBase 8s - 22 -

1 系统要求

1.1 硬件要求

硬件	最低配置	推荐配置
处理器	1×2 核 2.0GHz	4×4 核 3.0GHz
内存	4GB	64GB 或更多
硬盘	100GB	1TB
光驱	CD-ROM	CD-ROM

1.2 操作系统要求

GBase 8s 产品需要部署于 Redhat Enterprise Linux 6.x 64 位操作系统，建议以 Software Development Workstation 模式安装。

1.3 环境准备

在准备操作系统前，请阅读安装包中doc目录下的文件 ids_machine_notes_12.10.txt 中的“机器说明”。该机器说明还包括用于调整操作系统以支持 GBASE 实例的建议以及特定于您的操作系统的所有限制。

2 安装及配置数据库服务器

2.1 安装准备

1. 创建 gbasedbt 组和用户

在启动安装过程之前，必须准备系统以确保您有足够权限来执行安装。

您必须以 root 用户身份登录才能执行许多与安装有关的任务。同时要求服务器操作系统上具有 gbasedbt 组和 gbasedbt 用户。

登录系统后可以执行以下命令创建 gbasedbt 组和 gbasedbt 用户：

```
[root@localhost ~]# groupadd gbasedbt
[root@localhost ~]# useradd -g gbasedbt gbasedbt
```

为 gbasedbt 用户设置密码，密码为 gbasedbt：

```
[root@localhost ~]# passwd gbasedbt
```

2. 创建 GBase 8s 数据库安装目录

GBase 8s 数据库缺省的安装目录为 /opt/GBASE/gbase，并且此文件夹必须为空。

```
[root@localhost ~]# mkdir -p /opt/GBASE/gbase
[root@localhost ~]# chown gbasedbt:gbasedbt /opt/GBASE/gbase
```

3. 上传并解压安装包

将产品安装光盘插入光驱，取出光盘中 Setup 目录下的文件，复制到本地目录 /opt。Setup 目录中包含 GBase 8s 产品的安装包文件，该文件通常是形如 GBase8sVX.X_XXX.tar 的压缩文件

在本手册中，以GBase8sVX.X_XXX.tar 为例进行安装说明。

解压该 tar 包，解压命令为：tar -vxf filename.tar。

```
[root@localhost ~]# cd /opt
[root@localhost opt]# tar -vxf GBase8sVX.X_XXX.tar
ids_install
onsecurity
doc/
doc/ids_machine_notes_12.10.txt
doc/ids_unix_relnotes_12.10.html
ids.properties
.gbase.properties
```

2.2 安装方法

2.2.1 典型安装

您可以通过使用典型安装设置来快速安装 GBase 8s 及其所有功能部件。

缺省情况下，典型安装设置将创建为您的主机环境配置的即时可用的数据库服务器实例。但是，您可以禁用安装应用程序中的创建服务器实例选项。

以 root 身份登录，进入解压目录，执行要安装的产品的安装脚本 ids_install，即可进行安装，具体命令如下：

```
[root@localhost /]# cd /opt
[root@localhost opt]# sh ids_install
```

执行安装过程中，安装程序先检查系统环境，如果系统没有安装JDK，那么安装包会先解压JDK，自动安装到该系统中。如果已经安装，那么将显示产品的授权条款，并等待确认是否接受这些版权条款。

具体安装过程示例如下：

```
[root@localhost opt]# sh ids_install
Preparing to install...
Extracting the JRE from the installer archive...
Unpacking the JRE...
Extracting the installation resources from the installer archive...
Configuring the installer for this system's environment...

Launching installer...

Preparing CONSOLE Mode Installation...

=====
=====
Getting Started
-----

This application will guide you through the installation of GBase Software
Bundle.
Copyright General Data Corporation 2014, 2019. All rights reserved.

1. Release Notes
The Release Notes can be found in /opt/doc/ids_unix_relnotes_12.10.html.
2. Launch Information Center
Access the GBase Information Center at http://www.gbase.cn.
To Begin Installation, respond to each prompt to proceed to the next step in
the installation.
If you want to change something on a previous step, type 'back'.
You may cancel this installation at any time by typing 'quit'.
PRESS <ENTER> TO CONTINUE:

=====
License Agreement
-----

Installation and Use of GBase 8s Software Bundle Requires Acceptance of
the Following License Agreement:
```

Thank you for choosing GBase product!

Please read carefully the following licencing agreement before installing any product: TIANJIN GENERAL DATA TECHNOLOGY CO. LTD. LICENSE AGREEMENT

READ THE TERMS OF THIS AGREEMENT AND ANY PROVIDED SUPPLEMENTAL LICENSE TERMS (COLLECTIVELY "AGREEMENT") CAREFULLY BEFORE OPENING THE SOFTWARE MEDIA PACKAGE. BY OPENING THE SOFTWARE MEDIA PACKAGE, YOU AGREE TO THE TERMS OF THIS AGREEMENT. IF YOU ARE ACCESSING THE SOFTWARE ELECTRONICALLY, INDICATE YOUR ACCEPTANCE OF THESE TERMS. IF YOU DO NOT AGREE TO ALL THESE TERMS, PROMPTLY RETURN THE UNUSED SOFTWARE TO YOUR PLACE OF PURCHASE FOR A REFUND.

1. LICENSE TO USE. GeneralData grants you a non-exclusive and non-transferable license for the internal use only of the accompanying software and documentation and any error corrections provided by GeneralData (collectively "Software"), by the number of users and the class of computer hardware for which the corresponding fee has been paid.

2. RESTRICTIONS. Software is confidential and copyrighted. Title to Software and all associated intellectual property rights is retained by GeneralData and/or its licensors. Except as specifically authorized in any Supplemental License Terms, you may not make copies of Software, other than a single copy of Software for archival purposes. Unless enforcement is prohibited by applicable law, you may not modify, decompile, or reverse engineer Software. You acknowledge that Software is not designed, licensed or intended for use in the design, construction, operation or maintenance of any nuclear facility. GeneralData disclaims any express or implied warranty of fitness for such uses. No right, title or interest in or to any trademark, service mark, logo or trade name of GeneralData or its licensors is granted under this Agreement.

3. DISCLAIMER OF WARRANTY. Unless specified in this agreement, all express or implied conditions, representations and warranties, including any implied warranty of merchantability, fitness for a particular purpose or non-infringement are disclaimed, except to the extent that these disclaimers are held to be legally invalid.

4. LIMITATION OF LIABILITY. To the extent not prohibited by law, in no event will GeneralData or its licensors be liable for any lost revenue, profit or data, or for special, indirect, consequential, incidental or punitive damages, however caused regardless of the theory of liability, arising out of or related to the use of or inability to use software, even if GeneralData has been advised of the possibility of such damages. In no event will GeneralData's liability to you, whether in contract, tort (including negligence), or otherwise, exceed the amount paid by you for Software under this Agreement. The foregoing limitations will apply even if the above stated warranty fails of its essential purpose.

5. TERMINATION. This Agreement is effective until terminated. You may terminate this Agreement at any time by destroying all copies of Software. This Agreement will terminate immediately without notice from GeneralData if you fail to comply with any provision of this Agreement. Upon Termination, you must destroy all copies of Software.

6. EXPORT REGULATIONS. All Software and technical data delivered under this Agreement are subject to US export control laws and may be subject to export or import regulations in other countries. You agree to comply strictly with all such laws and regulations and acknowledge that you have the responsibility to obtain such licenses to export, re-export, or import as may be required after delivery to you.

7. CHINESE GOVERNMENT RESTRICTED. If Software is being acquired by or on behalf of the Chinese Government , then the Government's rights in Software and accompanying documentation will be only as set forth in this Agreement.

8. GOVERNING LAW. Any action related to this Agreement will be governed by Chinese law: "COPYRIGHT LAW OF THE PEOPLE'S REPUBLIC OF CHINA","PATENT LAW OF THE PEOPLE'S REPUBLIC OF CHINA","TRADEMARK LAW OF THE PEOPLE'S REPUBLIC OF CHINA","COMPUTER SOFTWARE PROTECTION REGULATIONS OF THE PEOPLE'S REPUBLIC OF CHINA". No choice of law rules of any jurisdiction will apply."

9. SEVERABILITY. If any provision of this Agreement is held to be unenforceable, this Agreement will remain in effect with the provision omitted, unless omission would frustrate the intent of the parties, in which case this Agreement will immediately terminate.

10. INTEGRATION. This Agreement is the entire agreement between you and GeneralData relating to its subject matter. It supersedes all prior or contemporaneous oral or written communications, proposals, representations and warranties and prevails over any conflicting or additional terms of any quote, order, acknowledgment, or other communication between the parties relating to its subject matter during the term of this Agreement. No modification of this Agreement will be binding, unless in writing and signed by an authorized representative of each party. When the translation document has the different meaning or has the conflicting views with Chinese original text conflict, should take the laws and regulations promulgation unit as well as the Generaldata issue Chinese original text as the standard.

All trademarks and registered trademarks mentioned herein are the property of their respective owners.

DO YOU ACCEPT THE TERMS OF THIS LICENSE AGREEMENT? (Y/N): Y

输入”Y”接受授权条款，按回车键继续。

1. 指定安装路径

根据界面提示确认默认安装路径 /opt/GBASE/gbase, 并回车。

```
=====
Installation Location
-----

Choose location for software installation

Default Install Folder: /opt/GBASE/gbase

ENTER AN ABSOLUTE PATH, OR PRESS <ENTER> TO ACCEPT THE DEFAULT:
```

2. 选择安装类型

```
=====
====
Installation or Distribution
-----

Select the installation type.

Typical: Install the database server with all features and a database server that
```

```
is configured with default values. Includes:
** Client Software Development Kit (CSDK)
** Java Database Connectivity (JDBC)
Minimum disk space required: 700-800MB

Custom: Install the database server with specific features and software that
you need.
Optionally install a configured database server instance.
Minimum disk space required: 75 MB (without a server instance)

->1- Typical installation
   2- Custom installation
   3- Extract the product files (-DLEGACY option)
   4- Create a RPM package for redistribution

ENTER THE NUMBER FOR YOUR CHOICE, OR PRESS <ENTER> TO ACCEPT THE DEFAULT:: 1
```

使用默认安装选项 1，直接回车，进行典型安装。

3. 创建实例

系统提示是否创建一个实例，默认选项 1 为创建，直接回车，创建一个实例。

```
=====
Server Instance Creation
-----

Create a server instance?

->1- Yes - create an instance
   2- No - do not create an instance

ENTER THE NUMBER FOR YOUR CHOICE, OR PRESS <ENTER> TO ACCEPT THE DEFAULT::
```

4. 选择数据库用户数

选择实例预期要支持的数据库用户数，默认选项为 1，直接回车继续。

```
=====
Configuration - Number of Users
-----

Select the number of expected database users.

->1- 1 - 100
   2- 101 - 500
   3- 501 - 1000
   4- 1000+

ENTER THE NUMBER FOR YOUR CHOICE, OR PRESS <ENTER> TO ACCEPT THE DEFAULT::
```

5. 配置结束，点击回车进行安装。

```
=====
Ready To Install
-----

InstallAnywhere is now ready to install GBase 8s Software Bundle onto your
system at the following location:
/opt/GBASE/gbase
PRESS <ENTER> TO INSTALL:

=====
Installing...
-----
```

```
[=====|=====|=====|=====]
[-----|-----|-----|-----]

=====
Server Initialization
-----

The server will now be initialized. Initialization might take quite a while,
depending on the performance of your computer.

PRESS <ENTER> TO CONTINUE:
```

安装后会提示将进行数据库实例的初始化，按回车继续。

6. 数据库实例创建成功并使用，点击回车后继续。

```
=====
=====
Using the new instance
-----

A database server instance was created. If you chose to initialize the
instance, it is ready to use.

You can open a command prompt to an initialized instance by running one of the
following commands at /opt/GBASE/gbase, where ol_gbasedbt1210 is the path or
filename of the instance.

Windows:
ol_gbasedbt1210.cmd

UNIX csh:
source ol_gbasedbt1210.csh

UNIX ksh or bourne:
./ol_gbasedbt1210.ksh

If initialization fails, check the online.log file for messages. The instance's
root chunk must be owned by the correct user and group, and it must have
readable and writable (rw) permission bits set only for owner and group.

PRESS <ENTER> TO CONTINUE:
```

7. 安装完成，回车后退出安装程序。

```
=====
=====
Installation Complete
-----

Congratulations! GBase Software Bundle installation is complete.

Product install status:
GBase: Successful
GBase Connect: Successful

Main Version: GBase 8s VX.X

For more information about using GBase products, see the GBase Information
Center at http://www.gbase.cn.

PRESS <ENTER> TO EXIT THE INSTALLER:
```

8. 配置环境变量

在使用 GBase 8s 数据库服务前需要设置几个环境变量。可以把安装目录下的 `ol_gbasedbt1210.ksh` 文件的内容追加到 `gbasedbt` 用户主目录下的 `.bash_profile` 文件中，以便于 `gbasedbt` 用户在登录后即自动应用这些环境变量。

如果要把 GBase 8s 安装目录下的 `ol_gbasedbt1210.ksh` 文件的内容追加到 `gbasedbt` 用户主目录下的 `.bash_profile` 文件中，可以执行以下命令：

```
[root@localhost ~]# cd /opt/GBASE/gbase
[root@localhost gbase]# cat ol_gbasedbt1210.ksh >>
/home/gbasedbt/.bash_profile
[root@localhost ~]# cd /home/gbasedbt/
[root@localhost ~]# source .bash_profile
```

配置完毕后，即可使用 GBase 8s 数据库。

2.2.2 定制安装

定制安装，也就是通常说的自定义安装。

使用定制安装可在安装 GBase 8s 时只带有您所需的功能部件。

2.2.2.1 执行安装

进入解压目录，执行安装脚本 `ids_install`，即可进行安装。具体命令如下：

```
[root@localhost ~]# cd /opt
[root@localhost opt]# sh ids_install
```

定制安装过程如下所示：

- 1.接受授权协议，内容详见 2.1.1 典型安装。
- 2.选择安装类型，输入 2 选择 Custom installation。

```
=====
=====
Installation or Distribution

Server Instance
-----

Type 'back' to go to the previous step or 'quit' to cancel the installation.

Create a database server instance?

    1- Yes - create a server instance
    ->2- No - do not create a server instance

ENTER THE NUMBER FOR YOUR CHOICE, OR PRESS <ENTER> TO ACCEPT THE DEFAULT::

=====
=====
Installation Summary
-----

Please review the following before continuing:

Product Name:
    GBase Software Bundle
```

```
Install Folder:
    /opt/GBASE/gbase

Product Features:
    GBase database server,
    Base Server,
    Extensions and tools,
    J/Foundation,
    Database extensions,
    Conversion and reversion support,
    XML publishing,
    Demonstration database scripts,
    Enterprise Replication,
    Data loading utilities,
    onunload and onload utilities,
    dbload utility,
    Backup and Restore,
    archecker utility,
    ON-Bar utility,
    Interface to Tivoli Storage Manager,
    Administrative utilities,
    Performance monitoring utilities,
    Miscellaneous monitoring utilities,
    Auditing utilities,
    Database import and export utilities,
    JSON Client Support,
    Global Language Support (GLS),
    Chinese

Disk Space Information (for Installation Target):
    Required: 497,274,517 Bytes
    Available: 9,861,873,664 Bytes

PRESS <ENTER> TO CONTINUE:

=====
=====
Ready To Install
-----

InstallAnywhere is now ready to install GBase Software Bundle onto your system
at the following location:

    /opt/GBASE/gbase
```

```
PRESS <ENTER> TO INSTALL:

=====
=====
Installing...
-----

[=====|=====|=====|=====
==]

[-----|-----|-----|-----
--]

=====
=====
Installation Complete
-----
Congratulations! GBase Software Bundle installation is complete.

Product install status:
GBase: Successful
GBase Connect: Successful

Main Version: GBase 8s VX.X

For more information about using GBase products, see the GBase Information
Center at http://www.gbase.cn.

PRESS <ENTER> TO EXIT THE INSTALLER:
```

安装结束，回车，退出安装。

2.2.2.2 使用脚本自动创建和初始化实例

安装完成后，可以使用 `GBseInit_gbasedbt.sh` 脚本自动创建和初始化实例。

将 `GBseInit_gbasedbt.sh` 脚本拷贝到 `opt/GBASE/gbase` 目录下。更改此脚本的执行权限：

```
[root@localhost ~]# cd /opt/GBASE/gbase
[root@localhost gbase]# chown -R gbasedbt:gbasedbt GBseInit_gbasedbt.sh
[root@localhost gbase]# ls -l GBseInit_gbasedbt.sh
-rw-r--r--. 1 gbasedbt gbasedbt 32705 Jan 15 10:10 GBseInit_gbasedbt.sh
```

使用 `gbasedbt` 用户执行该脚本。使用 `GBseInit_gbasedbt.sh` 脚本，自动创建并初始化实例。

```
[root@localhost gbase]# su gbasedbt
[gbasedbt@localhost gbase]$ sh GBaseInit_gbasedbt.sh

Initializing Program...OK

```

```
Creating database: gbasedb...OK

Now you can use this URL to connect to gbasedb:
jdbc:gbasedb:sql://192.168.8.123:9088/gbasedb:GBASEDBTSERVER=gbaseserver
;

Version:
GBase Database Server Version -- On-Line -- Up 00:00:13 -- 1121592 Kbytes
Build Number:      xxxx

GBase Initializing Finished!

Initialize log file : ./InitGBaseDB_201901081452.log

Press <ENTER> to Exit and Logout...
```

自动创建和初始化实例完毕，回车退出。

2.2.2.3 手动创建和初始化实例

您也可以按照如下步骤，手动创建实例并初始化。

- (1) 创建一个实例，假设其实例名为“gbaseserver”。
- (2) 创建一个实例需要配置以下三个文件，使用实例名作为文件的后缀：
 - a) 环境变量文件名为 `profile.gbaseserver`
 - b) 配置参数文件名称为 `onconfig.gbaseserver`
 - c) `sqlhosts` 配置文件名称为 `sqlhosts.gbaseserver`

具体步骤如下：

1 创建数据库的数据文件存储目录 /dbs

以 root 身份登录，进入安装目录，创建数据目录：

```
[root@localhost ~]# cd /opt/GBASE/gbase
[root@localhost gbase]# mkdir dbs
[root@localhost gbase]# cd dbs
[root@localhost dbs]# touch rootdbs
[root@localhost dbs]# chown gbasedbt:gbasedbt rootdbs
[root@localhost dbs]# chmod 660 rootdbs
```

2 配置 profile.gbaseserver 环境变量文件

切换到 gbasedbt 用户身份登录，将默认环境变量 `.bash_profile` 文件复制一份，命名为 `profile.gbaseserver`，并对它进行编辑。

```
[root@localhost dbs]# su gbasedbt
[gbasedbt@localhost ~]$ cd /home/gbasedbt
[gbasedbt@localhost ~]$ cp .bash_profile profile.gbaseserver
[gbasedbt@localhost ~]$ vi profile.gbaseserver
```

(进入文件后按“i”建，开启 insert 模式)

注意：根据实例的实际情况更改红色部分字段信息

```
export GBASEDBTSERVER=gbaseserver           //实例名
export GBASEDBTDIR=/opt/GBASE/gbase         //安装路径
export ONCONFIG=onconfig.gbaseserver        //配置参数文件名称
export GBASEDBTSQLHOSTS=$GBASEDBTDIR/etc/sqlhosts.gbaseserver //sqlhosts
                                                                文件名称

export PATH=$GBASEDBTDIR/bin:/usr/bin:${PATH}:.
export GL_DATE="%iY-%m-%d"
export DATETIME="%iY-%m-%d %H:%M:%S"
export DB_LOCALE=zh_cn.GB18030-2000
export CLIENT_LOCALE=zh_cn.GB18030-2000
export
LD_LIBRARY_PATH=${GBASEDBTDIR}/lib:${GBASEDBTDIR}/lib/esql:${GBASEDBTDIR}/
lib/cli
export TERM=vt100
export TERMCAP=$GBASEDBTDIR/etc/termcap
export GBASEDBTTERM=termcap
export DBTEMP=$GBASEDBTDIR/tmp
```

完成之后保存退出。（第一步按 ESC；第二步输入冒号“:”；第三步输入 wq 代表保存退出，q 代表退出，q! 代表强制退出。最后回车）。

使环境变量生效：

```
[gbasedbt@localhost ~]$ source profile.gbaseserver
```

为了 gbasedbt 用户在登录后自动应用这些环境变量，请执行以下操作：

vi .bash_profile 文件，此文件后添加以下内容。

```
source /home/gbasedbt/profile.gbaseserver
```

然后执行以下命令，使环境变量生效：

```
[gbasedbt@localhost ~]$ source .bash_profile
```

3 配置 onconfig.gbaseserver 参数文件

将 /opt/GBASE/gbase/etc/ 目录中的 onconfig.std 文档复制一份，命名为 \$ONCONFIG 变量指定的名称 onconfig.gbaseserver。

```
[gbasedbt@localhost ~]$ cd /opt/GBASE/gbase/etc/
[gbasedbt@localhost etc]$ cp onconfig.std onconfig.gbaseserver
```

vi onconfig.gbaseserver 文件，配置以下参数并保存：

提示：vi 编辑器中模糊查找字符串“XXX”方法：输入“/XXX”后回车即可向下检索到该字符串位置。

```
ROOTPATH    /opt/GBASE/gbase/dbs/rootdbs //系统数据库文件存储空间路径, 参照步骤 1
```

		中的设置
SERVENUM	1	//实例编号，多实例中每个实例编号要唯一
DBSERVERNAME	gbaseserver	//数据库服务器实例名称
TAPEDEV	/dev/null	//用于存储空间备份的磁带设备
LTAPEDEV	/dev/null	//用于逻辑日志备份的磁带的设备路径

4 配置 sqlhosts.gbaseserver 文件

GBase 8s 数据库使用的监听端口默认为 9088，多实例中每个实例的端口必须唯一。

将 /opt/GBASE/gbase/etc/ 目录中的 sqlhosts.std 文档复制一份，命名为 GBASEDBTDQLHOSTS 变量指定的名称 sqlhost.gbaseserver。

```
[gbasedbt@localhost ~]$cd /opt/GBASE/gbase/etc/  
[gbasedbt@localhost etc]$ cp sqlhosts.std sqlhosts.gbaseserver
```

vi sqlhosts.gbaseserver 文件，在文件末尾添加相关实例名、网络连接方式、IP 及端口号。

```
[gbasedbt@localhost etc]$ vi sqlhosts.gbaseserver
```

在文件末尾按照如下格式添加内容并保存：

实例名	网络连接方式	IP	端口
gbaseserver	onsoc tcp	192.168.127.101	9088

(IP 地址是**当前虚拟机中 IP**，可使用 ifconfig 命令查看)

5 初始化数据库

使用 gbasedbt 用户执行初始化命令：

```
[gbasedbt@localhost ~]$ oninit -ivy
```

2.2.3 静默安装

要执行静默安装（又称为无人管理的安装），请使用响应文件，其中包含关于想要如何进行该产品安装的信息。

要完成包含先前安装配置的静默安装，必须有响应文件，其带有想要如何安装该产品的定制设置。下列过程概述创建响应文件的两种不同方式：记录您安装的配置，或定制 bundle.properties 模板文件。该安装介质包含基于文本的 bundle.properties 文件，可将其用作创建响应文件的模板。

如果知道自己已有有效的响应文件，则请从下列过程中的步骤 3 开始。

1. 通过下列步骤之一来创建响应文件：

- 执行 GBase 8s 安装脚本，录制模板生成响应文件。

```
[root@localhost opt] ./ids_install -r /opt/bundle.properties
```

安装完成后，将在 /opt 路径下生成响应文件 bundle.properties。

- 创建安装介质上的 **bundle.properties** 文件的副本，并为想要的安装配置编辑该文件。

重要：请不要对安装介质中发送的 bundle.properties 文件进行重写、移动或删除。

必须将定制的 .properties 文件中的产品许可证条款协议设置更改为“true”

(-DLICENSE_ACCEPTED=TRUE)，以便在静默安装期间作为响应文件。

2. 将响应文件复制至想要安装 GBase 8s 和任何打包的客户机程序的计算机。
3. 运行静默安装命令，指示响应文件的相对或绝对路径：

```
[root@localhost opt] ./ids_install -i silent -f /opt/bundle.properties  
-DLICENSE_ACCEPTED=TRUE  
(DLICENSE_ACCEPTED 参数指示接受许可协议)
```

4. 在想要部署同一安装设置的每一位置上，重复步骤 2 和 3。
5. 配置数据库服务器。

安装完成后，需要设置环境变量、配置参数和连接文件信息，才能使用数据库服务器。

可参阅 [2.2.2.2](#) 或 [2.2.2.3](#) 章节的内容进行配置。

3 使用 GBase 8s 数据库

1.启动/停止数据库服务

通常情况下，使用 `gbasedbt` 用户来启动和停止数据库服务。

成功安装数据库 GBase 8s 后，数据库会自动处于启动状态，可通过以下命令检查服务进程是否存在：

```
[root@localhost opt]# ps -ef|grep oninit
gbasedbt 10830      1  0 19:52 ?        00:00:04 /opt/GBASE/gbase/bin/oninit -vy
root      10831 10830  0 19:52 ?        00:00:00 /opt/GBASE/gbase/bin/oninit -vy
root      10832 10831  0 19:52 ?        00:00:00 /opt/GBASE/gbase/bin/oninit -vy
root      10833 10831  0 19:52 ?        00:00:00 /opt/GBASE/gbase/bin/oninit -vy
root      10834 10831  0 19:52 ?        00:00:00 /opt/GBASE/gbase/bin/oninit -vy
root      10835 10831  0 19:52 ?        00:00:00 /opt/GBASE/gbase/bin/oninit -vy
root      10836 10831  0 19:52 ?        00:00:00 /opt/GBASE/gbase/bin/oninit -vy
root      10837 10831  0 19:52 ?        00:00:00 /opt/GBASE/gbase/bin/oninit -vy
root      10915 10831  0 19:52 ?        00:00:00 /opt/GBASE/gbase/bin/oninit -vy
root      11997  5051  0 20:02 pts/0    00:00:00 grep oninit
```

以 `gbasedbt` 用户身份登录后，输入 `onmode -ky`，可停止数据库服务，示例如下：

```
[gbasedbt@localhost ~]$ onmode -ky
```

输入 `oninit -vy`，启动数据库服务，示例如下：

```
[gbasedbt@localhost ~]$ oninit -vy
Warning: Parameter's user-configured value was adjusted. (DS_MAX_SCANS)
Warning: Parameter's user-configured value was adjusted. (ONLIDX_MAXMEM)
Reading configuration file
'/opt/GBASE/gbase/etc/onconfig.ol_gbasedbt1210'...succeeded

```

输入 `ps -ef|grep oninit` 检查数据库服务进程是否存在:

```

[gbasedbt@localhost ~]$ ps -ef|grep oninit
gbasedbt 12056      1  0 20:14 ?        00:00:00 oninit -vy
root      12057 12056  0 20:14 ?        00:00:00 oninit -vy
root      12058 12057  0 20:14 ?        00:00:00 oninit -vy
root      12059 12057  0 20:14 ?        00:00:00 oninit -vy
root      12060 12057  0 20:14 ?        00:00:00 oninit -vy
root      12061 12057  0 20:14 ?        00:00:00 oninit -vy
root      12062 12057  0 20:14 ?        00:00:00 oninit -vy
root      12063 12057  0 20:14 ?        00:00:00 oninit -vy
root      12064 12057  0 20:14 ?        00:00:00 oninit -vy
gbasedbt 12134 12116  0 20:25 pts/0    00:00:00 grep oninit

```

登录数据库

以 `gbasedbt` 用户身份登录, 输入 `dbaccess --` 命令进入数据库命令行模式, 示例如下:

```

[gbasedbt@localhost ~]$ dbaccess --
>

```

创建数据库

在 `dbaccess` 交互命令行中, 执行如下SQL语句, 创建数据库, 示例如下:

```

[gbasedbt@localhost~]$ dbaccess --
> create database gbase8s;

Database created.

```

4 卸载 GBase 8s

当用户需要卸载 GBase 8s 数据库系统时，需要先停止数据库服务，切换到 root 用户，进入安装目录下的 `uninstall/uninstall_ids`，执行该目录下的 `uninstallids` 命令进行卸载。

卸载程序开始后，选择 **2** 并回车，删除所有相关联的数据库文件，示例如下：

```
[root@localhost ~]# cd /opt/GBASE/gbase/uninstall/uninstall_ids
[root@localhost uninstall_ids]# ./uninstallids

Preparing CONSOLE Mode Uninstallation...

=====
=====
Uninstall GBase Software Bundle
-----

About to uninstall GBase Software Bundle.

In this uninstall process, all GBase Software Bundle products in
/opt/GBASE/gbase will be uninstalled.
It is recommended that you first shutdown all database server instances related
to this installation prior to uninstalling the product.

PRESS <ENTER> TO CONTINUE:

=====
=====
Server Uninstall Options
-----

Server action:

Important: Choosing to remove all databases will remove all database chunks,
environment files, registry entries, and message log files for all database
server instances associated with this installation.

  ->1- Retains all databases, but removes all server binaries
      2- Removes server binaries and all databases associated with them

ENTER THE NUMBER FOR YOUR CHOICE, OR PRESS <ENTER> TO ACCEPT THE DEFAULT:: 2
